

Romain LAURENT

Web Developer

OBJECTIVE

Passionated of the informatic domain for a long time, I started developping in Python in 2019. I like challenges and always go as far as possible in my passions. Since I discovered the development, I never stopped learning and I have always pushed my limits. In this perspective I would like to increase my experience to challenge myself and learn more and more.

EXPERIENCE

Notice | Front Developer Intern | 06/2022-09/2022

Notice being a young startup in full development, I was able to participate in the development and construction of their content creator tool for the web. This experience allowed me to acquire many skills, whether in ReactJS, TypeScript, in the use of GitHub as a team, the Slack communication tool, and many other tools.

But I was also able to develop broader skills, such as product development and communication.

Epitech Digital | Lead Developer | 12/2021

[Student Project]

As a Lead Developer I led a team of 3 developers to develop a website using PHP, MySQL and JavaScript. We have created BeeBrave, a site to connect people wishing to go for a walk or a run, and for each kilometer run, participants receive money which they can then donate to an association of their choice among associations selected by BeeBrave.

Fédération Française du Bâtiment | Fixed-term contract Web Integrator | 09/2021-10/2021

The company being in full redesign of their website, I participated in the integration of content in it, using the CMS SiteCore. Given my fairly quick learning of SiteCore, I also helped few employees to use it.

FORMATION

Bachelor manager of web project specialized in web development | Epitech Digital | 2021 – Today

In web development branch, I learn to develop for the Backend and Frontend and participate very regularly transversal projects, mixing the 3 branches of the school (Web Development, Design and Marketing) to respond to realistic issues and to use what we learnt in each branch.

Baccalaureate | Cours Secondaire d'Orsay | 2006 – 2021

Obtained in 2021 with Good mention, I had chosen Numeric & Informatic Sciences and Plastic Arts specialities, with the Italian option.

HOBBIES

I'm passionate about digital arts, but also about videogames, computers, learning new languages and listen to music.
